

KAREEM SHIRAZI

Product · AI · UX · Strategy

SUMMARY

Product leader with 12+ years building and scaling products at high-growth companies. Proven track record of driving triple-digit growth through user-centric product strategy, experimentation, and team building. Deep expertise in ecommerce, marketplaces, media, and subscription businesses serving millions of users. In 2025 I started my own consultancy to help companies focus, move faster, and ship what matters. Attracted to complex problem spaces that require thoughtful human-centered design.

EXPERIENCE

Owner | Product Consultant

2025 — Present

KHS Consulting

- Advise consumer, media, and e-commerce companies on product strategy, growth systems, discovery, and AI-enabled workflows.
- Advised media brand on product positioning and subscription flow; helped drive subscription growth through simplification.
- Embedded across 5 DTC portfolio brands as the fractional Head of Product + Growth (Bond Holdings)
- Launched Don.co from zero — built the e-comm site, onboarded vendors, stood up CS workflows, integrated a 3PL partner, and built the ad library.
- Built an in-house AI-powered static-ad workflow and produced ~100 creatives to seed portfolio-brand testing.

VP of Product

Aug '22 — Oct '25

The Infatuation · Acquired by JPMorgan Chase

- Built and led a team of 6 PMs, each running a cross-functional squad — collectively shipped 100+ roadmap items that grew user accounts, product engagement, content discovery, booking volume, and more.
- Owned redesign + GTM of iOS and Android apps: +30% sign-up rate, +150% monthly downloads, +15-20% MAU/mo, stable 30d retention.
- Championed a design-forward, data-informed product culture that reduced analysis paralysis and encouraged learning-by-shipping.
- Led the OKR and Strategy setting process for the company, and led the cross-functional check-ins to ensure alignment and progress.
- Deepened our relationships with key partners (Apple Maps, Google Maps, OpenTable, and Sevenrooms) that directly contributed to audience growth and product engagement.
- Led the integration into Chase post-acquisition; built premium experiences and drove incremental dining spend via Link & Dine and other promotional programs.
- Developed the system to leverage our in-person food festival (Eeeeeatscon) as a product research lab, giving us a new way to test ideas and prototypes with real users.
- Built the foundation for an AI-powered Infatuation restaurant discovery bot.

Head of Product

Sep '21 — May '22

Pawp

- Worked closely with CTO & CEO building foundational product, setting company/product strategy, and iterating on brand positioning as we expanded our offering.
- Optimized the core telehealth experience and post-care UX to better serve users and reduce churn.
- Designed, built, and launched an O&O pet pharmacy + digital prescription product from scratch.
- Delivered 15+ roadmap initiatives and launched 2 new business lines within 6 months, opening new acquisition channels, lifting CSAT/NPS, and expanding our addressable market.
- Worked with our Head of Design to operationalize a product discovery culture to de-risk future bets.

SIDE PROJECTS

Unnamed Cooking App

A voice-first iPhone app that turns on-hand ingredients into dinner plans, full recipes, and a shared grocery list. Designed so you use what you have and minimize food waste. Built with SwiftUI, Cloudflare Workers, OpenAI/OpenRouter structured output with deterministic validation.

Marketing Truth Checker

Chrome extension bringing AI-powered transparency to online shopping — analyzes product pages on Amazon, Shopify, and the open web for Supported / Misleading / Unverified verdicts. BYOK architecture, under a penny per analysis.

FPL Optimizer

I love soccer. A web app that pulls live squad data from the official Fantasy Premier League API and helps managers select the best transfers for any given gameweek. Leverages a Mixed Integer Linear Program to maximize expected points.

Travel Concierge Bot

Experimental Chatbot for a travel media brand — RAG architecture over a decade of long-form editorial content, delivered in the brand's voice. Subscribers text trip questions and the bot surfaces curated recommendations from the publication's own articles.

Affiliate Link Builder

Google Apps Script sidebar that brings affiliate link generation into Google Docs for creator teams — accepts product URLs, infers anchor text from URL tokens, and generates affiliate-wrapped links without leaving the writing environment.

EXPERIENCE (CONTINUED)

Staff Product Manager (Contract)

Jun '21 — Nov '21

Buzzfeed

- Led the redesign of BuzzFeed.com homepage — 60-80M monthly visits, untouched since 2016.
- Partnered with C-suite and SVPs to align requirements, metrics, and KPIs; ran a lean team of 5.
- Advised on other internal projects within the organization related to News, Video, and Shopping.

Director of Product

Oct '19 — Jun '21

Trade

- Owned the end-to-end customer experience for the business, focused on return users, LTV, and retention.
- Through intentional product strategy and sequencing, helped achieve a +330% subscriber base growth (+100k paying subs).
- Reported to CEO and lead the org-wide OKR setting and alignment process, helping all teams
- Designed and shipped our purpose-built CS tool that helped the team quickly and efficiently resolve customer issues, helping protect churn and boost CSAT.
- Connected user needs to business goals, materially changing our payback economics and unlocking CAC flexibility.
- Led a team of 1 PM, 5 devs, 2 designers; acted as interim Head of Product Design.

Senior Product Manager, Mobile

Jul '18 — Aug '19

Button

- Owned the mobile SDK experience for Button's mobile affiliate network — the product layer powering attribution for publishers and revenue for merchants running promotions through partner apps.
- Rewrote my team's operating model to focus on high-leverage work, reduce thrash, and produce higher quality output for 6 devs + 1 designer.
- Led product initiatives across the publisher network, diagnosing supply-side activation gaps and shipping features that helped improve conversion.

Senior PM, Customer Experience

Nov '14 — Jul '18

Jet.com · Acquired by Walmart

- Led a mobile team of 6 iOS + 4 Android engineers and 2 designers
- Spearheaded the full UI/UX redesign of the iOS and Android apps, working with design, eng, data, and marketing leading to app share of GMS growing from 13% → 22%.
- Owned the Apple partnership that made the app the subject of a 2018 Apple Pay commercial and Apple's default e-commerce example in developer documentation.
- Developed a comprehensive mobile experience strategy that drew on ethnographic research, interviews, experience maps, persona development, and quantitative behavioral data.
- Routinely leveraged our in-house Product Development Lab to conduct product discovery and speak with real users.
- Forged strategic partnerships with Google + Apple on Payments, iMessage Apps, ARKit/ARCore, Instant Apps.
- Earlier as PM (employee #~60): built the foundational elements of the site — homepage, promo engine, order history, returns, search, PDP/PLP, checkout, nav.
